Reviews

*It is an awesome ebook which i actually have at any time read through. It usually fails to charge excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.

Both inner and outer tanks are made of the best charcoal iron, and are tested at a hydraulic pressure of 100 lbs. to the square inch. The wrought-iron flues, C C, are 6 inches in diameter, and connecting the upper and lower portions of the steam jacket, are of course always filled with currents of steam and hot water; thus presenting an extensive heating surface in the centre of the fat, or other material to be treated, and at the same time equalizing the temperature in and around the Digester. These flues also tie and brace the head and bottom, of the Digester. To further strengthen the apparatus, tie-rods, D D, pass through the flues, and connect the head and bottom of the outer tank. The outer tank and Digester are also fastened together at frequent intervals, at their tops, bottoms and sides, by stay-bolts. The two tanks thus united in one, constitute the major part of the apparatus, and will now be termed the Rendering Tank. The Rendering Tank is supported upon cast-iron legs, one of which, is shown at E. Underneath is the furnace, with the fire-door and draft-door at F F. The heats and products of combustion pass from under the bottom of the...
