By Arthur L. Bowley

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 228 pages. Dimensions: 9.0in. x 6.0in. x 0.5in. An excerpt from the Authors Preface: This manual is intended for the use of those who desire some knowledge of statistical methods and statistical results without going deeply into technicalities or undertaking mathematical analysis; it is hoped that it will be of service to all who have occasion to use statistics in their own business or profession, or who take an intelligent interest in public affairs. It is also designed as a first course in statistics for students who wish to proceed further in the subject and, if it serves its purpose will stimulate interest in the many fascinating problems that await solution, and that can only be attacked by the methods of modern mathematical statistics. The first part deals with elementary methods and with such technical terms and ideas as are indispensable in the handling of numbers on a large scale. In the second part the origin of many groups of public statistics is shown, their adequacy is criticized, and some of the more interesting results which are based on them are briefly summarized. This part is...
